Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 28th October, 1884.

Sir

My attention having been drawn by the Director's letter of October 23rd 1884, to the identity of the Statement of ounces refined in the months of November and December 1883, I found the allegation correct, and in order to rectify it fully, I reexamined the Monthly Reports in minute detail from August 1884 back to October 1883. The Report on Ounces refined for November 1883 having been inadvertently repeated in December 1883, all the subsequent Reports on the ounces refined to July, 1884, are pushed forward one month ahead of their proper time. Instead of attempting to rectify the reports forwarded to Washington, I made the work I think more complete and

prepared a new set of the Complete and Correct Reports, which I herewith transmit, together with the two Reports for November and December, 1883, which were received from the Department a week since. I will make a single remark, that altho' I have examined all the Reports in detail I have found but a single error, other than the sliding of the Report on ounces, viz. that in the Report for November, 1883, the cost of labor was miscopied $150, instead of $180=,

Very respectfully
